

SKY STAGE ULTRA

It's a

SKY CLIMBER
"Access Innovations Since 1955"

Sky Stage Ultra is a "third generation" modular platform that combines the best of current technology with new concepts. Sky Stage Ultra operates in any work environment including commercial restoration, painting, sandblasting, waterproofing, caulking, window cleaning, inspections, off-shore oil rigs, and general building maintenance.

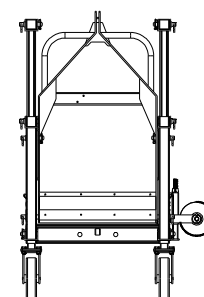

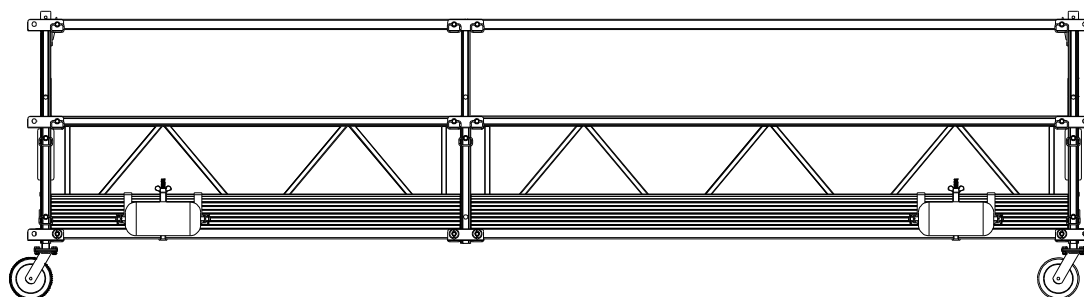

Features and Benefits

- CE approved
- A 12 m span between suspension points (2 hoists)
- Reinforced, reversible floor panels provide a more stable platform
- Floor lifting handles to make dismantle easier, safer and quicker
- Floor hold down tab retaining pins for easier dismantle
- Telescoping posts with 2 levels of adjustment for more versatility
- Top rail lock pin assembly to prevent accidental release and jamming
- Compatibility with older platforms in the industry to afford fleet optimization
- Modular design for easy storage, transport and replacement
- Lighter weight and wheels for easier movement
- Quick & easy installation that requires no tools
- Strong stirrup, special designed for mechanical anti-tilting safety device
- Load rated up to 1080 kg
